

Lingkan Wang

B2C UX Focus AI Product Architect

Hi there! I'm a product designer with 3 years of experience building AI-powered B2C products. I believe great products come from understanding users and turning insights into action.

Experience

Design Lead

Varsity Tutors | Parent User ExperienceJan. 2025 - Aug. 2025

Led product discovery and MVP definition for a parent-facing dashboard at a 5M+ user edtech platform. Conducted mixed-methods research (104-parent survey, interviews, workshops, and AI-assisted transcript analysis) to identify key needs around progress visibility and actionable insights. Redesigned legacy PDF reports into a streamlined dashboard with AI-generated highlights and next-step recommendations, improving information clarity and engagement. Validated MVP through 5 iterative cycles and 16 usability tests, refining information hierarchy and decision-making support.

Product Designer Intern

Ecovacs Robotics | Smart Home RoboticsMar. 2024 - May. 2024

Led end-to-end UX for AI Auto-Cleaning on DEEBOT X2 across iOS and Android. Identified key pain points (mapping, setup complexity, pet-waste detection) through user feedback and prioritized by impact. Designed auto-mapping and one-tap AI cleaning, replacing manual setup with adaptive, room-based strategies and transparent controls. Reduced setup time by 93% and manual interactions by 65%, driving 92% user preference and +50% purchase intent.

Product Designer Intern

Kwai | Kuaishou International BusinessMay. 2024 - Aug. 2024

Led end-to-end UX design for a guild data monitoring dashboard serving 300+ overseas live-streaming guild leaders, including PC dashboard and automated reporting. Identified a critical gap in trend visibility (DoD/WoW/MoM), which led to delayed response to streamer performance decline and revenue loss. Designed a unified dashboard with churn alerts to enable proactive monitoring and intervention. Reduced risk-detection time by 65% and drove a 20% MoM retention lift among top-performing guilds.

Product Designer

Taimer.ai | Founding Product & Design TeamFeb. 2023 - Sep. 2023

Led product design on a 5-person founding team, building an AIGC platform for home interior design with text-to-image, image-to-image, and image recognition. Conceptualized a human-in-the-loop AI tool that generates personalized renovation plans, reducing design iteration time from 1 week to 1 hour. Drove up to 95% design-to-deal conversion and acquired 20,000+ beta users. Co-developed fundraising strategy and investor narrative, advancing to final-stage at MiraclePlus and winning Outstanding Project at the Tsinghua AIGC Innovation Challenge.

Education

Carnegie Mellon University

M.S. | HCII METALSAug. 2024 - Dec. 2025

GPA 3.97/4.0 and Merit Scholarship recipient. Coursework spans interaction design, learning sciences, user research, and human-AI interaction, applied through real-world capstone projects and CMU research labs. Published at ACM CHI 2026 and ICLS 2026 on collaborative VR learning and edtech for underserved learners.

Product Designer

B.F.A. | Digital Media ArtSep. 2019 - Jul. 2023

GPA 3.8/4.0 and Excellent Graduate of Beijing Municipality. Trained across digital media, visual design, and interactive art; collaborated on HCI research projects with Tsinghua University Future Lab and published at AHFE 2024, CHCI 2022, and IEEE ICOT 2021. Won Milan Design Week First Prize and 20+ design awards during undergraduate years.

Skills & Tools

Research

- User Interview
- Survey
- Infinity Mapping
- Persona
- Competitive Analysis
- Data Analysis
- Behavioral Funnel Analysis
- Usability Testing
- A/B Testing
- Journey Map

Design

- Brainstorming
- User Flow
- Information Architecture
- Wireframing
- Rapid Prototyping
- Low-fi Prototype
- High-fi Prototype
- Interaction Design
- Moodboard
- User Interface Design

AI Design

- AI-Assisted Design
- Prompt Design
- Human-in-the-loop Systems
- Generative UX

Cross-functional

- MVP Definition
- Feature Prioritization
- Product Launch
- Operational Readiness

Tools

- Figma
- Claude
- CodeX
- ChatGPT
- Midjourney
- Miro
- Adobe Photoshop
- Adobe After Effect
- SQL
- Azure
- Webflow
- Voiceflow

Language

- English (Professional)
- Mandarin (Chinese Native)
